Hiroto Robinson

Graham, WA | (252) 269-9088 | robinsonhiroto@gmail.com | https://www.linkedin.com/in/robinsonhiroto/

Full-Stack Web Developer with 2 years of experience in Web Stacks involving Javascript, Typescript, React, NodeJS. Experienced in AGILE team environments collaborating to deliver custom e-commerce platforms to automate online business management and transactions. Quick thinking, communicative, and always learning. I strive to improve myself each day and hold accountability for the code I push.

EXPERIENCE

Jr. Front End Developer   **February 2022 – January 2023**
Clarity Ventures, Seattle, WA
- Collaborated in AGILE team environments to design and develop 12+ custom e-commerce platforms, providing automated solutions to businesses expanding their online presence
- Developed architecture of 4 HIPAA-compliant solutions for clients, preserving data security alongside intuitive storefronts.
- Managed client interactions spanning discovery meetings and working sessions for first-hand knowledge of client's needs to deliver custom, tailored e-commerce experiences
- Transitioned component library from AngularJS to React
- Utilized Azure for manual/pipeline deployments of client sites and for task management via Azure's Kanban

Web Developer   **June 2021 – January 2022**
Freelance, Seattle, WA
- Architected, developed, and maintained websites for 3 small businesses using Typescript/Gatsby/NextJS concurrently
- Maintained mail server and content updates to keep sites up to date, providing efficient, excellent customer experience
- Managed and maintained client satisfaction and provided insight on direction of online business presence

EDUCATION

Full-Stack Web Development – Grade A+ Average   **March 2021 – June 2021**
University of Washington Bootcamps, Seattle, WA
- 12 Week Intensive Course covering web development languages such as HTML5, CSS3, JavaScript(ES6+), Handlebars, and SQL.
- Libraries included React, Node, Express, mySQL, Sequelize, Mongoose, MongoDB, and more.
- Gained in depth and hands on knowledge and practice with OOP, data structures, algorithms, RESTful practices, AGILE methodologies, as well as MVC * CORS architecture.
- **MENTION YOU WINNING ALL 3 PROJECTS – HUGE ACCOMPLISHMENT**
